

How It Works: Creating Better Outcomes for Our Partners and their Customers

January 27, 2022

We believe legacy underwriting systems drive inefficiencies for both our partners and their customers.

Pagaya has built a leading artificial intelligence network to help our partners convert more potential customers and retain the relationship while providing a positive user experience that results in greater brand affinity and lifetime value.

Our goal is to enable better financial outcomes for our partners and their customers while building a more inclusive financial infrastructure.

Contact us to learn more about what we can do together.
