

PAGAYA TECHNOLOGIES LTD.

3Q'26 Earnings Supplement

October 29, 2026

Forward Looking Statements and Non-GAAP Information

Certain comments made in this presentation may be characterized as forward looking under the Private Securities Litigation Reform Act of 1995. Forward looking statements are based on the Company's current assumptions regarding future business and financial performance. Those statements by their nature address matters that are uncertain to different degrees and involve a number of factors that could cause actual results to differ materially.

Additional information concerning these factors is contained in the Company's Annual Report on Form 10-K filed with the SEC on March 2, 2026, as amended on April 30, 2026 and June 1, 2026, as well as its other filings with the SEC. Copies are available from the SEC, from the Pagaya website, or from Pagaya Investor Relations. Any forward-looking statement made in this presentation speaks only as of the date on which it is made. The Company assumes no obligation to update or revise any forward-looking statements except as required by law. These charts and any associated remarks and comments are integrally related and are intended to be presented and understood together.

In an effort to provide additional and useful information regarding the Company's financial results and other financial information as determined by generally accepted accounting principles (GAAP), the Company also discusses in its earnings press release and corresponding materials certain non-GAAP information including fee revenue less production costs (FRLPC), FRLPC as a % of Network Volume (FRLPC %), Adjusted Net Income, Core Operating Expenses, Core Operating Expenses as a % of FRLPC, Adjusted EBITDA and Adjusted EBITDA Margin to provide investors with additional information about our financial performance and to enhance the overall understanding of the results of operations by highlighting the results from ongoing operations and the underlying profitability of our business. Management believes these non-GAAP measures provide an additional tool for investors to use in comparing our core financial performance over multiple periods.

However, non-GAAP financial measures have limitations in their usefulness to investors because they have no standardized meaning prescribed by U.S. GAAP and are not prepared under any comprehensive set of accounting rules or principles. In addition, non-GAAP financial measures may be calculated differently from, and therefore may not be directly comparable to, similarly titled measures used by other companies. As a result, non-GAAP financial measures should be viewed as supplementing, and not as an alternative or substitute for, our unaudited consolidated financial statements prepared and presented in accordance with U.S. GAAP. To address these limitations, management provides a reconciliation of Adjusted Net Income and Adjusted EBITDA to net income attributable to Pagaya Technologies Ltd., a reconciliation of FRLPC to operating income, and a reconciliation of Core Operating Expenses to operating expenses, and calculations of Adjusted EBITDA Margin, FRLPC as a % of Network Volume and Core Operating Expenses as a % of FRLPC. Management encourages investors and others to review our financial information in its entirety, not to rely on any single financial measure and to view each non-GAAP metric in conjunction with its respective related GAAP financial measures.

A description of each non-GAAP financial measure, together with the rationale for management's use of this non-GAAP information is included in our earnings press release, furnished to the SEC as Exhibit 99.1 to the Company's Current Report on Form 8-K filed on October 29, 2026. The reconciliation of non-GAAP information to GAAP is included in the section titled "Non-GAAP Reconciliations" in this presentation.

In addition, Pagaya provides an outlook for the fourth quarter and full year 2026 on a non-GAAP basis. The Company cannot reconcile its expected Adjusted EBITDA to expected net income attributable to Pagaya Technologies Ltd. or its expected FRLPC as a % of Network Volume to expected operating income without unreasonable effort because certain items that impact net income attributable to Pagaya Technologies Ltd., operating income and other reconciling items are out of the Company's control and/or cannot be reasonably predicted at this time, which unavailable information could have a significant impact on the Company's U.S. GAAP financial results.

Investments in loans & securities – sensitivity analysis, stress scenarios

Our portfolio of investments in loans & securities have been adjusted to fair value as of 9/30/2026.

For purposes of GAAP Net Income guidance, we have assumed the implied fair value adjustments over the life of the portfolio reflected in Scenario A below.

Illustrative scenarios (\$ in millions)	Base Case <i>(as of 6/30/2026)</i>	Scenario A	Scenario B
Change in expected cash flows – management estimate	–	(10%) – (20%)	(20%) – (30%+)
Implied credit-related impairment of investments in loans and securities	–	~(\$100) – (\$150)	~(\$150) – (\$200+)

Sensitivity scenarios reflect management estimates for credit-related impairments on investments seasoned for two years or less, which amount to substantially all investments in loans and securities.
